B.Tech CSE, SRM IST-Kattankulathur, 2027

Summary

Final-year Computer Science undergraduate at SRM (CGPA 9.21/10) with hands-on experience across agentic AI, full-stack applications, and backend services. Have built multi-agent systems using LangGraph, RESTful APIs, authentication flows, and NoSQL-backed applications, along with a consistent focus on data structures and algorithms through coursework and independent practice. Comfortable picking up a new part of the stack when a problem calls for it, and I enjoy the process of turning a rough idea into something that actually works.

Education

SRM IST-Kattankulathur Chennai, India
B.Tech, Computer Science and Engineering *2027*
– CGPA: 9.21/10

Experience

Technical Team Member Sep 2024 – Oct 2025
Dbugs Lab SRM Club *Chennai, India*
– Developed and debugged AI-assisted software applications and backend workflows across 5+ active projects, applying core data structures and algorithms fundamentals to reduce average bug resolution time by 30%.
– Collaborated in a 10+ member cross-functional team to translate software designs into production code across the SDLC.

Projects

Athena – Agentic AI Academic Assistant | *LangGraph, FastAPI, Typescript, React.js, Docker* Jan 2026 – May 2026
– Independently architected an agentic AI system using LangGraph where 5 specialist agents – Advisor, Planner, Summarizer, Flashcard, and Quiz – each own one task in a directed graph, applying sound software design to eliminate single-model chatbot bottlenecks.
– Engineered persistent vector memory using ChromaDB, a NoSQL vector store, namespaced per user via Clerk ID, retaining weak subjects, preferences, and session history for long-term personalization.

StayEase | *React.js, Node.js, Express.js, MongoDB Atlas, Vercel, Render* June 2025 – Oct 2025
– Developed a full-stack vacation rental platform with end-to-end flows for property listing, booking, user authentication, and reviews using React.js, Node.js, and Express.js.
– Engineered 15+ RESTful API endpoints with MongoDB Atlas, implementing authentication and authorization using JWT, sessions, and Passport.js with Local, Google, and GitHub OAuth.
– Deployed the frontend on Vercel and backend on Render, integrating the application through REST APIs for seamless client-server communication.

Certifications

GitHub Copilot – GitHub (AA08812813372AB3) – Jun 2026

Achievements

Top Performer, COSC HackWeek 2025 – Chaitanya Bharathi Institute of Technology
Champion Tier, Google Arcade
Rank 48, SRMJEEE (All India)

Skills

Languages: Python, C++, Java, JavaScript, SQL
Frontend: React.js
Backend: Node.js, Express.js, FastAPI
Databases: MySQL, MongoDB Atlas (NoSQL), ChromaDB (Vector/NoSQL)
AI Applications: Agentic AI, LangGraph, Vector Databases, Multi-Agent Workflows
AI Dev Tools: Claude Code, Cursor, GitHub Copilot
Tools and Technologies: Git, GitHub Actions, Docker, Postman, CI/CD Pipelines, Vercel, Render,AWS(EC2)
